Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimotori *et al.* (Jap. Pat. No. 09294579) (“Shimotori”) for the reason set forth in the last Office action.

Applicants have amended the claims to include limitations previously examined. With regard to claim 1, the added limitation is considered to be an intended use limitation, and therefore, is given no weight. With regard to claim 4, the patent teaches the claimed invention as set forth in the last Office action.

Response to Arguments

Applicants’ arguments filed 12/06/04 have been fully considered but they are not persuasive.

Applicants argue that the cited art prefers to add moisture after the microwaving/hot air step and that in light of the recent claim amendments, the art no longer anticipates the claimed invention. The fact that a prior art reference lists a step as optional, does not remove the teaching from the realm of anticipation. Applicants make reference to a newly supplied English translation of the cited patent. The translation is only partial.

Art Unit: 1761

Applicants discuss the “sake degree” and also flavor and body and how it relates to the amino acid content. There are no limitations directed to these details and because the prior art teach the process that is claimed it is inherent that they obtain the same product. The claims are not limited to the production of sake. If there is a step that causes a difference to occur, this must be disclosed and claimed.

Lastly, it is noted that applicants state the when the disclosed rice material is used to produce the koji, water is added. See page 5, lines 5+.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
